

# Thank you

Merry Christmas and a big thank you to all of the organisations working together in North West London to transform healthcare provision for our 2.3 million residents and beyond.

**Find more information about all of these programmes please visit our website or join us on Twitter**

**Twelve ways ICHP and our partners are collaborating and innovating to improve health outcomes across North West London and beyond.**

With Christmas coming just once a year, we're highlighting 12 innovative projects that have this year helped our local health system turn innovation into reality, ensuring the 2.3 million residents of North West London receive the best possible care and outcomes.

### Good will

We launched the pan-London Atrial Fibrillation (AF) Toolkit (with our London AHSN partners), supporting commissioners and clinicians to reduce AF related strokes.

### Inspiring

We supported the sold out TEDxNHS event in August "Inspired by People", which was attended by over 300 people and livestreamed to more than 100 sites across the NHS.

### Toasting

More than 130 people took part in our Accountable Care capability building programme – and we launched a learning lab to support continuous learning for the participants

### Reflecting

More than 200 people attended our "Innovation in Healthcare" summit, hosted in partnership with IGHI and WISH, spreading innovative ideas and featuring high profile keynote speakers including health minister Lord O'Shaughnessy.

### Joyful and triumphant

Our work in Atrial Fibrillation (AF) supported the identification of more than 4,000 patients with AF, closing the predicted prevalence gap by nearly 15%.

### Magical

We launched a new grant-finding service to help innovators gain access to funding for their projects.

### Celebrating

We've recruited 49 people to our Q community, a connected community of clinicians, managers and lay partners working together to improve healthcare across North West London.

### Jingle all the way

Dozens of frontline staff and executives participated in our Intrapreneur programme, learning how to adopt innovation in their roles and delivering change across their organisations.

### Receiving

We gained approval to launch Discover in 2018 – a register for people 18 and over living in North West London who are interested in research. This will make it easier for researchers to find people to take part in research.

### A time for giving

We supported staff from Central and North West London NHS Foundation Trust and Imperial College Healthcare NHS Trust in being awarded bursaries to undertake MScs in patient safety.

### Merry and Bright

Hundreds of residents across North West London had their pulse checked for Atrial Fibrillation (AF) as part of our two Global AF Awareness Week campaigns.

### Feliz Navidad

We have grown our Business Intelligence team, who have been evaluating services and digital apps for our partners, as well creating dashboards on conditions such as Atrial Fibrillation (AF) and sepsis.
